Languages: Python, Java, C#, C, PHP, SQL

Technologies & Tools: Git, LangChain, Docker, FastAPI, AWS, S3, Athena, Azure, SQL Server, SQLite, Android Studio, MATLAB

Education

Inter American University of Puerto Rico – Bayamon, PR

May 2026

Bachelor of Science in Computer Science

CGPA: 3.8

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Mobile Computing

National University of Engineering – Managua, Nicaragua

Credits Approved: 114

Bachelor of Engineering in Computer Engineering

CGPA: 3.6

Relevant Coursework: Programming Languages, Operating Systems, Computer Networks, Advance Data Structures and Algorithms, Information Retrieval

Work Experiences

Universidad del Sagrado Corazón, San Juan, PR

October 2024 – Present

Software Developer (Lead Developer)

- Led and supervised up to 3 team members on software and integration projects.
- Managed and supported university registration and administrative systems including Jenzabar, Canvas, Zoho, Simplicity, and StarRez.
- Developed integrations and in-house solutions using Python, C#, TypeScript, Deluge, APIs, and LTI tools.
- Collaborated with cross-functional teams and software vendors to implement projects and improve university operations.
- Managed SQL databases and prepared technical documentation for system maintenance and future development.

Xtillion, San Juan, PR

June – Aug 2024

Software Engineering Intern

- Developed an AI-powered workflow framework using Python, FastAPI, OpenAI APIs, and LangChain to automate complex business processes.
- Automated transaction processing workflows, reducing manual processing time from 3 hours to 2 minutes.
- Built OpenAI LLM-based solutions to parse reimbursement data, extract key information, and identify missing user inputs.
- Developed Terraform infrastructure for Snowflake and Databricks data warehouses and created Python and SQL scripts for data processing pipelines.

Evertec, San Juan, PR

June 2023 – May 2024

Software Engineering Intern

- Developed cloud process automation solutions using Python to improve operational efficiency.
- Used Terraform and Infrastructure as Code (IaC) practices to deploy and manage scalable cloud infrastructure.
- Created and managed Microsoft Azure resources to support reliable cloud environments.
- Developed scripts to query and manage **Amazon Web Services (AWS)**, improving cloud resource monitoring and management.

Projects & Activities

Raytheon Unmanned Aircraft Systems Showcase

Aug 2023 – Apr 2024

UniPlanner Student Planner App

Apr 2020

Leadership & Awards

IHackathon 2024 Inter Bayamon

Apr 2024

- First Place among one hundred participants from the nine campuses of the Interamerican University of Puerto Rico

20th Inter-University Programming Competition

May 2023

- First Place in the expert category among one hundred participants from various universities across Puerto Rico

Torohack 7.0 California State University

Apr 2023

- Second Place among approximately three hundred participants nationwide, with some international participants
